

*In this week's recap: a hiring surge, a noteworthy remark from Jerome Powell, a dip for a respected household confidence index, and gains on Wall Street.*

# Weekly Economic Update

## FEBRUARY BEGINS WITH SOME EXCELLENT ECONOMIC DATA

Payrolls swelled with 304,000 net new jobs last month, according to the Department of Labor's February employment report. (A Bloomberg survey of economists had projected a gain of 165,000.) The number of Americans temporarily laid off or working part time for economic reasons increased greatly in January as a consequence of the partial federal government shutdown; that left the unemployment rate (4.0%) and underemployment rate (8.1%) higher. Average hourly wages were up 3.2% year-over-year. Additionally, the factory sector expanded at a faster pace last month: the Institute for Supply Management's purchasing manager index improved 2.5 points to a mark of 56.6.<sup>1,2</sup>

## FED HINTS AT THE POSSIBILITY OF PAUSING RATE HIKES

The Federal Reserve made no interest rate move last week, but at its January 30 press conference, Fed chairman Jerome Powell had an interesting comment for the media: "We believe we can best support the economy by being patient before making any future adjustment to policy." To investors large and small, that remark sounded like a declaration that the central bank was ready to exercise extra caution in considering future rate increases. Powell noted the recent emergence of "some crosscurrents and conflicting signals about the [economic] outlook" as a factor.<sup>3</sup>

## HOW ARE CONSUMERS FEELING?

The latest readings on the country's two most-watched consumer confidence indices look good, but one just took a major fall. The Conference Board's monthly index went from a December mark of 126.6 to 120.2 in January. In its final January edition, the University of Michigan's consumer sentiment gauge displayed a 91.2 reading, up 0.5 points from its preliminary version.<sup>2</sup>

## MAJOR INDICES MAKE ANOTHER WEEKLY ADVANCE

Last week, the Dow Jones Industrial Average, S&P 500, and Nasdaq Composite all gained more than 1.3%, thanks in part to some of the developments mentioned above. The S&P rose 7.87% during January. Oil ended the week at \$55.31 on the NYMEX; gold, at \$1,322.60 on the COMEX.<sup>4,5</sup>
